

(I) CLAIMS

1. A Pacifier Attacher comprising:
 - a. A length of a flexible material with two opposite extremes;
 - b. The first extreme containing an adhesive material to detachably attach said flexible material to a baby's garment; and
 - c. The second extreme containing a means for attaching a pacifier to said flexible material.
2. A Pacifier Attacher comprising:
 - a. A length of a flexible material with two opposite extremes;
 - b. The first extreme containing a substantially flat means to detachably attach said flexible material to a baby's garment comprising a repositionable adhering material that will not destroy the baby's garment when removed; and
 - c. The second extreme containing a means for attaching a pacifier to said flexible material.
3. The pacifier attacher of claim 2 in which said substantially flat means is an adhesive capable of detachably attaching to fabric.
4. The pacifier attacher of claim 2 in which said substantially flat means is a reusable fabric grip attaching means capable of detachably attaching to fabric.
5. The pacifier attacher of claim 2 in which said substantially flat means is a disposable fabric grip attaching means capable of detachably attaching to fabric.
6. The pacifier attacher of claim 2 in which said flexible material is disposable.

7. The pacifier attacher of claim 2 in which said first extreme containing a substantially flat means to detachably attach said flexible material to a baby's garment is formed into a design or shape.
8. The pacifier attacher of claim 2 in which said means for attaching a pacifier to said flexible material comprises at least one adhesive portion substantially near said second extreme of said flexible material for the purpose of detachably attaching said second extreme to any portion of the remaining flexible material to form a loop to sufficiently retain a pacifier.
9. The pacifier attacher of claim 2 in which said means for attaching a pacifier to said flexible material comprises a permanent loop at said second extreme of said flexible material for the purpose of detachably attaching a pacifier to said flexible material by pushing said permanent loop through a hole or handle on a pacifier, and then pulling the pacifier attacher through said permanent loop.
10. The pacifier attacher of claim 2 in which a non-stick material is provided to cover adhesive portions until use.
11. The pacifier attacher of claim 2 in which said pacifier attacher is provided in sterile packaging.
12. The pacifier attacher of claim 2 in which said flexible material is resilient.
13. The pacifier attacher of claim 2 in which said flexible material is waterproof.
14. The pacifier attacher of claim 2 in which said flexible material is plastic.
15. The pacifier attacher of claim 2 in which said flexible material is decorated in a child-friendly manner.

16. The pacifier attacher of claim 2 in which any portion of said flexible material is stuffed with another material.
17. The pacifier attacher of claim 2 in which said first extreme is thicker than the remaining length of said flexible material.
18. The pacifier attacher of claim 2 in which said first extreme is wider than the remaining length of said flexible material.
19. The pacifier attacher of claim 2 in which said flexible material is of the same width throughout.
20. A Pacifier Attacher comprising:
 - a. A length of a flexible material with two opposite extremes;
 - b. The first extreme containing a substantially flat means to detachably attach said flexible material to a baby's garment comprising a repositionable adhering material that will not destroy the baby's garment when removed; and
 - c. The second extreme containing a means for attaching a pacifier to said flexible material comprising at least two opposed attaching means; a first attaching means substantially closer to said second extreme of said flexible material than a second attaching means for the purpose of detachably attaching said first attaching means to said second attaching means to form a loop to sufficiently retain a pacifier.
21. The pacifier attacher of claim 20 in which said opposed attaching means comprises opposed hook and pile fasteners.

22. The pacifier attacher of claim 20 in which said opposed attaching means comprises opposed snap members.
23. The pacifier attacher of claim 20 in which said opposed attaching means comprises an adhesive containing portion and a non-stick portion for easy removal of pacifier.
